SUMMARY

Product Manager with 2+ years writing and reviewing the documents regulated software ships on: PRDs, user stories, acceptance criteria, release collateral, training content, and stakeholder updates for an FDA-aligned clinical SaaS platform. Much of the job is judging written output against requirements: testing releases against acceptance criteria in UAT, checking compliance documentation for consistency, and rewriting the same product change for surgeons, radiologists, hospital administrators, engineers, and leadership. Uses LLM tools in day-to-day product work, including building prompt-driven workflows that turn unstructured meeting notes into structured product signals.

CORE COMPETENCIES

Specification & Documentation: PRDs, User Stories, Acceptance Criteria, Release Collateral & Training Content, User Acceptance Testing, Requirements-to-Test Traceability, Compliance Documentation (IEC 62304 / IEC 62366-aligned)

Content Evaluation: Accuracy & Consistency Review, Requirement/Instruction Adherence, Audience Tailoring (Executive, Technical, End User), User-Facing Copy, Written Feedback on Documentation

AI & Tools: LLM-assisted Workflows (Claude), Prompt & Output-Schema Design, Jira, Confluence, Figma, Power BI

WORK EXPERIENCE

BrainSight Technology Pvt Ltd — Associate Product Manager (L1) Mar 2024 – Present

- Authored PRDs, user stories, and acceptance criteria for an FDA-aligned SaMD platform scaled from 0 to 50+ hospital deployments; owned UAT, testing each release against written criteria and documented clinical workflows across neurosurgery and radiology.
- Wrote release collateral and training materials for 15+ product releases, adapting each change for neurosurgeons, radiologists, hospital administrators, and internal tech support teams.
- Maintained risk-management and compliance documentation with regulatory and quality teams across 10+ releases, keeping requirements, test evidence, and release claims consistent for audit and submission readiness.
- Identified an unmet need for structured patient communication and wrote the PRD for a radiologist reporting module (HTML-to-PDF output, role-based access) through release, including launch messaging with Marketing and Customer Success.
- Wrote leadership updates that translate engineering delays and regulatory risk into decision-ready summaries for non-technical stakeholders.
- Designed LLM-assisted workflows that extract taxonomy-mapped opportunity signals from client meeting notes, defining the taxonomy, output structure, and rules for merging duplicate signals.
- Diagnosed critical defects in the data-processing pipeline and set up structured defect tracking with engineering, reducing product failure rate by 40% in two months.

ResMed India Pvt Ltd — Sleep Coach Mar 2023 – Sep 2023

- Explained diagnosis and therapy options to patients in plain language within a compliance-governed process, converting 12.5% of cold leads and moving 33% of diagnosed patients to long-term therapy.

Sleepiz India Pvt Ltd — Project Development Associate Jun 2021 – Dec 2022

- Wrote monitoring protocols and intervention procedures for critical patient cases in a remote patient monitoring product used across 5 cities, contributing to a 30% reduction in hospital readmissions and a 20% gain in team efficiency.
- Created training materials for sales, operations, and service teams, standardizing protocol adherence and shortening onboarding.

Cerner Healthcare Solutions India Pvt Ltd — Medical Billing Specialist Jun 2018 – Mar 2019

- Reviewed denied and pending claims against the requirements of 20+ US insurers to find the errors behind rejections, increasing successful claim resolution by 90%.
- Documented recurring rejection patterns and proposed revised workflows, reducing issue recurrence by 50%.
